

Objective

Look for twitter accounts for listed celebrities on wikipedia.

Description

Going through the list of American film actresses on **wikipedia** and extract all the actress names. Then verify whether they have **twitter** accounts. If they do, record their twitter profile page URL. Instead of saving output data to a text file, it's a plus to store in database with actress/twitter_url columns and make it efficient to search by name(actress). **Mysql** is preferred. Attach instruction, output text, or database dump, along with the codes.

Please avoid using **twitter gem** to do the job and write your own parse logic to verify celebrity twitter page.

Output Sample

ACTRESS|TWITTER URL

...

Amy Acker|https://twitter.com/AmyAcker

Lauren Ambrose

Selena Gomez|https://twitter.com/selenagomez

Alyssa Milano|https://twitter.com/alyssa_milano

Taylor Swift

...
